SWITCH
SMARTER

ABOUT US

As a professional manufacturer and pioneer designer for electrical products, we are spreading our high quality and cost-effective product, professional service and innovative design from Gujarat to the pan India.

WHO WE ARE

Products, systems and solutions for managing electric power since 2011. Promot has been doing all this and much more, guaranteeing continuous improvement in every kind of housing style. Made in India combines design and technology with a view to increased reliability and energy savings. We have a term for all of this **Switch Smarter.**

Light is energy, heat, life. We have been working towards this with passion and desire for innovation since 2011, as we believe in growth and know that identity can only grow with tradition. Only in this way can we enjoy the history of success and achievements that sees us leading the Indian sector today, and present in the most important international markets.

Enchanting elegance for MODERN SPACES.

SWITCH SMARTER

VISION

To redefine modern living with innovative modular switches and smart home automation, blending style, convenience, and advanced technology.

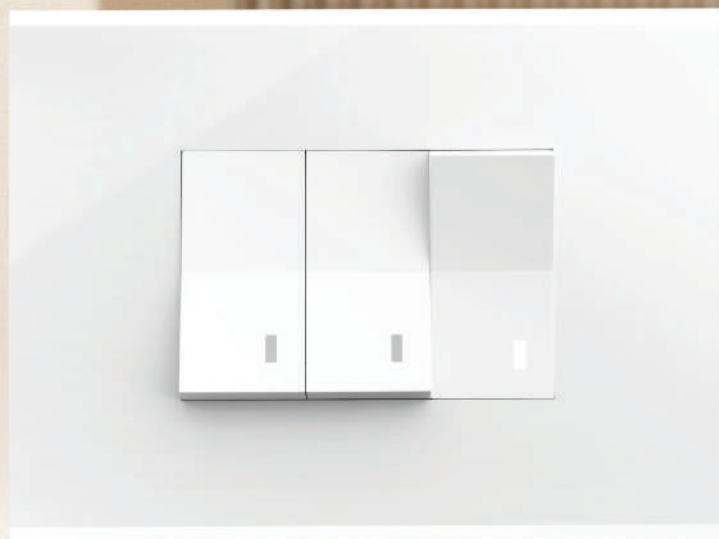

Introducing...

pixel

MODULAR SERIES

Pixel Series products are built for reliability under pressure. Their robust performance begins with a specially designed bi-material support frame that bears the entire stress of wiring within the junction box — ensuring strength and stability even under demanding conditions.

10426	C32 DP MCB	787.00	878.00	10

240/450V~ 50-60Hz 3kA Breaking Capacity

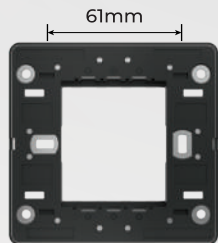

Advanced Bi-Material Frame

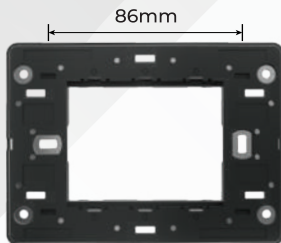

At the heart of the Pixel Series is the innovative bi-material frame, the result of extensive R&D efforts. This frame combines the rigidity of steel with the insulation and anti-corrosion benefits of engineering-grade plastic. The steel core provides structural strength, while the plastic encasement ensures safety, rust-resistance, and long-term durability.

Comfort & Reliability Built On High-Performance Material

Precision-Crafted for Safe & Enduring Installations

Designed with architectural integrity in mind, our 5-part switch incorporates a PBT- engineered chamber that securely houses brass terminals- ensuring thermal stability and enhanced electrical insulation. The moving mechanism is built with RFL material, capable of withstanding up to 650°C, allowing for smooth actuation over years of use without deformation. Contact points are crafted from high-grade silver, minimizing arcing and ensuring consistent, spark-free performance. This construction not only delivers superior safety but also ensures longevity, making it a trusted choice for premium residential and commercial projects.
